

Corporate Overview

Model 9000R Rotary Labeling System

Highlights:

- Leader in the design, manufacture and integration of Pressure-Sensitive, Roll-Fed, Print-and-Apply and Shrink Sleeve labeling systems for traditional and non-traditional applications
- **Accraply Labeling Systems** for pressure sensitive applications
- **Trine Labeling Systems** for roll-fed label applications
- Shrink-Sleeve systems incorporating the wide range of Graham and Accra-Sleeve applicators and heat tunnels
- The single source for complete parts and service support for Avery, CCL, Collamat, Mateer Burt, PPA Albro,

SEE/Taxta, Trine and Accraply labels including complete rebuild and upgrade programs.

- A complete source for Print-and-Apply systems supporting the Avery, Mateer Burt, Zebra, Sato, and Accraply Brands
- Comprehensive inventory of in-stock parts for on-time delivery of all supported brands with experienced, factory-trained technicians for service and training
- A full range of Pre-Owned and Certified Labelers

Barry-Wehmiller

Accraply Corporate Overview

Accraply, a Barry-Wehmiller company, is a leading provider of pressure-sensitive and print and apply labeling machinery to the pharmaceutical, food, beverage, consumer products and electronics industries.

With the acquisition of Trine Labeling Systems, Accraply became one of the largest suppliers of labeling equipment with revenues of over \$30 million. The headquarters of Accraply will remain in Minneapolis and the Trine product line provides an important addition to the Los Angeles operations. Accraply also has a third base of operations in the Toronto area.

The company's comprehensive product line allows Accraply to provide technology solutions that satisfy a broad range of requirements for both labeling and non-labeling application.

Accraply's pressure-sensitive labeling technologies provide precise product handling and flexibility, enabling the equipment to easily adapt to changing needs. Available in inline and rotary configurations, Accraply machines can be utilized to apply a wide array of labels including paper,

foils, clear films, and thin films at speeds exceeding 3000 inches per minute with a + 0.010 inch staging accuracy. In addition to high accuracies, Accraply labelers are extremely durable and feature state-of-the-art controls and drives, advanced product and label sensing systems, and precise microstepping and servo indexing drives.

Accraply's Print and Apply models utilized the latest in thermal transfer technology from Avery, Zebra, and Sato to deliver dependable results. Whether the application is low speed/semi-automatic or high speed/fully automatic, Accraply's systems offer clear text and 100% readable barcodes. Additionally, Accraply's FDA-compliant LabelView software solution provides network connectivity, enabling the control of multiple printer/applicators with a single PC and communication with manufacturing software and PLCs, as well as detailed tracking, reporting and auditing functionality.

Accraply also specializes in the manufacture of custom designed equipment for specialized labeling

Accraply's Model 230 Label Applicator

needs that extend beyond the configuration of standard systems.

In addition to offering reliable equipment, Accraply provides service and support for more than 10,000 installed machines. A complete inventory of spare parts and ribbons are in-stock and available for quick delivery, minimizing downtime. And experienced, factory-trained service technicians are available for on-site service and operator training to ensure continued optional machine performance.

Each Accraply machine is custom-designed for each application, taking unique product and plant requirements into consideration to ensure efficiency and operational excellence. From planning to production, Accraply delivers single-source benefits, integration and the most advanced technology available today.
